The perfect solution for all smart home devices

## GP Smart Home Battery Solutions

Devices – including appliances, electronics, entertainment systems, plant-watering and pet-feeding mechanisms, and ambience and lighting systems – become “smart” when they begin operating in concert instead of in isolation. Think digital locks, safety detectors, sensors, remote controls and e-shutters.

Mission-critical functions such as burglary and fire alarms, smoke and carbon monoxide detectors require a portable, fail-safe power source to ensure that devices are working exactly when they should be working. Device failure could result in loss of property or even life.

GP Batteries has over 50 years’ experience offering portable power solutions to the market. GP offers a broad range of quality batteries in various shapes and sizes, as well as chemistries for specific needs.

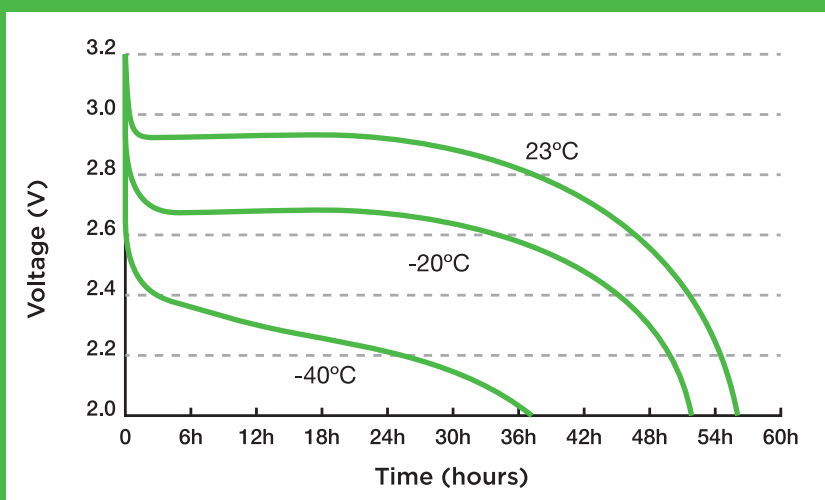

### Primary Lithium

### Alkaline

### CR123A Performance Characteristics

### GP Advantages

- Wide product range
- Robust sealing design
- Up to 10 years’ service life\*
- Operation across a wide temperature range, from -40°C to 60°C\*
- Fail-safe performance for long-term use: especially suited to home-security and life-saving devices
- Installed PTC and vent hole designs\*
- All batteries comply with UN38.3, UL1642, UL2054 and IEC60086-4 safety standards

\* Primary lithium cylindrical batteries
